## About LPS Integration

### Our Goal

We want you to think of LPS Integration as your personal, Trusted IT Advisor. When you want an unbiased opinion, you can count on LPS to give you the right information. We hope you come to count on LPS Integration in the same way many other organizations ranging from small businesses to Fortune 500 companies, do today.

### Driving Principles

LPS concentrates on delivering solutions to our customers, and not just selling "boxed products". LPS will never sell a product to a customer that they don't need; and you can always count on the honesty and integrity of our firm, whether you are a customer, a vendor, or a partner.

### Industry Experience

Founded as a service-oriented company, technical expertise is the driving force of LPS Integration. LPS Integration engineers have years of experience in the IT field. Technical certifications held by our full time staff of engineers are to the right.

## About LPS Integration

### Why we are different

LPS has more engineers on staff than any other IT firm in the area. Most IT providers have a large sales force with limited ability to support the technologies they sell. LPS has made a commitment to 24x7 support, at the highest level, for any and all technologies it represents. This commitment requires a large staff of engineers to be available to our clients at all times. With this in mind, LPS makes a significant investment in personnel and training to ensure that we are able to provide our clients with the support they need. At LPS, our clients come first. We back this statement with the following:

» **24x7 Support** – All our clients enjoy professional support from LPS Integration 24 hours a day, 7 days a week.

» **Direct Access** – Clients have direct access and direct contact information for LPS engineers, directors, as well as management and owners.

» **Technology Lab** – LPS has a state of the art technology lab full of the hardware and software that LPS supports. If you have a question about a product before you buy it, you can come to our lab and check it out for yourself.

» **Open House Events** – LPS Integration holds regular lunch and open house events for our clients, guests, and friends. These events are sponsored by our vendors, and they feature both presentations and hands-on labs and demos on the technologies being showcased that day.

» **Exclusive Events** – LPS Integration has hosted exclusive events for our executive guests, featuring industry-leading guest speaker such as Mark Templeton, President and CEO of Citrix Systems, and John W. Thompson, Chairman and CEO of Symantec Corporation.
